##### **Bonnybridge Silica & Fireclay Co Ltd**

Originated with partnership in 1874 of Azariah Griffiths of Sheffield and Alexander Whyte, flesher, of Alma St, Falkirk. Griffiths became sole partner in 1887. The company was incorporated as Bonnybridge Silica & Fireclay Co in 1906. In 1936, merged with Calder Fireclay Co (founded in 1880) which ran Armadale Brickworks, and combined company then opened Chapelhall Works. Torwood Mine opened in 1940s and company took over Aitkendean Mine, Carrington, Midlothian in the 1960s although this closed shortly afterwards. In 1961 the company was bought from the family and re-financed by Scotcros Ltd and re-named Bonnybridge Refractories Ltd. The company was sold to Hepworth Ceramic Holdings in 1972. Bonnybridge Works closed in 1973 and Chapelhall Works closed in 1980.

Bonnybridge Silica & Fireclay Co operate as manufacturers of bricks and refractory ceramic products. The company's registered office is in Linlithgow, West Lothian.

Bonnybridge Silica & Fireclay Co was incorporated in 1969 with the registration number SC047123.

**Callendar Brick & Fireclay Co Ltd**

Callendar Brick & Fireclay Co Ltd was formed in 1947 following the nationalisation of coal, but the company's origins date back to around 1832 when brickworks were built on the south side of Lock 5 of the Forth & Clyde Canal. These works were taken over by James Potter of Glenfuir by 1860 and James Potter & Co was established by 1886. James Potter was also a partner in the Callendar Coal Co from 1868, along with William Forbes and James Dougal. Callendar Coal Co leased the mineral rights of Callendar Estate. The brick and fireclay works were moved to Glen Village in the 1880s and thereafter were part of the Callendar Coal Co. When coal was nationalised in 1947, the brickworks were separated off into a private company, the Callendar Brick & Fireclay Co Ltd. In 1967 the company was bought by Hepworth Iron Co and the works closed down (believed to have closed some time after 1978 – skeleton staff in later years).

### **Castlecary Fireclay Co Ltd**

Castlecary Fireclay Co was established during the late 19th century by Alexander Weir and incorporated in 1909. The works in Castlecary were known as Weir's Castlecary in order to distinguish from Stein's Castlecary Works which were nearby. The company acquired Faskine & Palacecraig Brick & Coal Co in 1918. It was taken over by General Refractories of Sheffield in 1936 and became part of the Glenboig Union Fireclay Co. The works closed in 1968.

The Company was incorporated in 1909 with the registration number SC007127, and went into liquidation in 1919. It was re-incorporated in 1919 with the registration number SC010598, and was dissolved in 1937.

**Craigend Refractories**

Craigend Brickworks Ltd was established in 1938 on the site of the drift mine at Craigend, Falkirk, leased to the company by Carron Co. The works closed in 1943 due to lack of demand for bricks, but re-opened after the war. The name was changed to Craigend Refractories Ltd in February 1972 and the company was sold to Amalgamated Anthracite Holdings Ltd. In 1983 the Carbrook Mine and Craigend Works were closed and the remaining assets and trade names sold to the Burn Fireclay Co of Morpeth.

A1330.338	Oct 1944	Plan showing Castlecary mine workings up to October 1944.

**Hurll, P. & M. Ltd**

P & M Hurll Ltd (est. 1887) owned Birkhill Clay Mine in Bo'ness. Birkhill Clay Mine had high quality fireclay deposits which had been exploited since the 18th century and this was used to make firebricks for industrial use. Mark Hurll, a firebrick manufacturer from Glenboig, Lanarkshire, leased Birkhill from Hamilton Estates in 1908 and the company of P & M Hurll took over the mine in 1916. P & M Hurll went into liquidation in July 1980.

**Towers, J. & A**

Refractory. Established in 1857 by James Towers, operating from Grahamston Fire Brick Works. On the death of James Towers in 1890 the firm passed to his son, Alexander. Alexander died in 1909 and the firm was run temporarily by a Mr Howie and then passed on to Alexander's son, James. During the First World War the firm was mainly involved with the production of component parts for heating ranges and slow combustion stoves. The business prospered with the growing demand for domestic firegrates during the housing expansion between the wars. James's daughters both worked in the firm. Helen supervised technical developments and production until her death in 1967, while Winifred dealt with administration and sales. James died in 1970 and the firm transferred to Winifred. The works were closed in May 1972 and the business wound up.
